Cassowary - Wikipedia There are three extant species. The most common of these, the southern cassowary, is the third-tallest and second-heaviest living bird, smaller only than the ostrich and emu. 10 Facts About Cassowaries | Mental Floss the southern cassowary is earth's second-heaviest bird. Scientists currently recognize three living species of cassowary—all of which are restricted to New Guinea, northeastern Australia, and. Cassowary - The Most Dangerous Bird on Earth Casuaris casuaris, or simply Cassowary has been named the world's most dangerous bird in the Guinness Book of Records. Found in the rain forests of Australia and New Guinea, these shy birds can slice you into two pieces with a single fatal kick (slightly exaggerated).

The Southern Cassowary - The Most Dangerous Bird on Earth ... The female Cassowary, on the other hand, does and is stronger and bigger than the male. During the mating ceremony it is the male who takes the passive role and the female can take up to three different mates contiguously. The final partner she attracts will be the one to rear the young. That's correct, after a month or so of courtship the female lays the clutch of eggs and removes herself. World's Most Dangerous Bird: 7 Facts About The Cassowary Some have claimed the cassowary to look like a "giant prehistoric turkey", but they are in fact descendants of dinosaurs. Looking somewhat like a combination of a turkey and an ostrich, their body features different colours and textures (from feathers to skin) like that of a dinosaur, from their. Cassowary Habitat, Diet, Attack, Sound, Facts | Most ... Cassowary Facts What is a Southern Cassowary? The Southern Cassowary, also known as the Double-wattled Cassowary, is the most dangerous bird on the planet. It is also the second largest bird in the world.

Cassowary Facts - Daintree Discovery Centre The Southern Cassowary is a big bird " adults can stand more than two metres tall and weight up to 85 kilograms but the average is about 38 kilograms for males and about 47 kilograms for females. Males and females are similar in appearance. They both have a tall "casque" or helmet on their heads, and brilliant red and blue neck wattles. But mature females are usually much larger than the.
