The Chemistry of Things - aquimicadascoisas.org "The Chemistry of Things" aims to unveil the chemistry hidden in our day-to-day lives and show how the recent developments of Science contribute to the welfare of Society. Everything around us, in Nature and elsewhere is made of "chemicals". Chemistry - Wikipedia Chemistry is a branch of physical science that studies the composition, structure, properties and change of matter.[1][2] Chemistry includes topics such as the properties of individual atoms, how atoms form chemical bonds to create chemical compounds, the interactions of substances through intermolecular forces that give matter its general. What Is Chemistry? - Live Science Chemistry is the study of matter, its properties, how and why substances combine or separate to form other substances, and how substances interact with energy. Many people think of chemists as being white-coated scientists mixing strange liquids in a laboratory, but the truth is we are all chemists.

The Chemistry of Depression - Neurotransmitters and More The illustration above depicts the junction between two nerve cells. Packets of neurotransmitter molecules are released from the end of the presynaptic cell (the axon) into the space between the two nerve cells (the synapse. The Chemistry of Toothpaste - www.ChemistryIsLife.com Toothpaste is paste used on a tooth brush for cleaning teeth and a product well known by Americans and used frequently each day. I chose to research toothpaste because I wanted to show people how much chemistry is involved in something as simple and commonly used as toothpaste. Chemistry - definition of chemistry by The Free Dictionary chemistry - the chemical composition and properties of a substance or object; "the chemistry of soil" substance - the real physical matter of which a person or thing consists; "DNA is the substance of our genes.
